The **Aquasanita DR-001** dispenser is a great addition to any kitchen or bathroom. Thanks to the fact that the dispenser container is hidden, it doesn't take up any unnecessary space. The dispenser can be filled with a wide range of products according to your preferences.

For kitchen and bathroom

In the kitchen, it serves as a jar dispenser. In the bathroom, it is used as a liquid soap dispenser. In public washrooms, they can be used as gel or disinfectant dispensers.

Universal use

The dispenser can be filled with a wide range of different preparations (cleaning agents, soaps, shower gels, body and facial cosmetics...).

Easy fulfillment

To fill, simply pull out the tap and pour in the content through the opening. It is not necessary to unscrew the dispenser.
