The company **Aquasanita** is one of the most well-known manufacturers of kitchen equipment on the market. They export over 80% of their products to more than 30 countries worldwide. Aquasanita sinks and faucets meet the most demanding requirements for processing and quality of construction.

The kitchen faucet model **Aquasanita Rondo 2581** is a traditional model with a pull-out sprayer and a switch between a straight and a shower stream.

The surface of the sink faucet is made of crushed granite. A black granite faucet, but also a sand, white or metallic one, will perfectly complement a granite sink in similar shades. Of course, it is also possible to use this lever faucet with stainless steel sinks, where it will enhance the overall impression of the washing area.

The Rondo 2581 kitchen battery features a fully rotatable retractable head. It offers the option to switch between a stream of water and a shower with the push of a button. The telescopic shower with a 150 cm long hose will be appreciated in every household, especially when rinsing large pots, pans, or simply flushing all the dirt from the sink into the drain.

The granite sink faucet is equipped with a high-quality 40mm ceramic cartridge from the Kerox brand. In flow mode, the water passes through a Neoperl aerator that reduces water consumption. The surface of the faucet can be cleaned similarly to the sink made of the same material, if needed, simply wipe it with a damp cloth and regular soap.

Key features of the AQUASANITA RONDO 2581 kitchen faucet

- granite faucet Rondo 2581 in white, black, gray, and beige color
- high-quality lever faucet from the trusted brand Aquasanita
- ideal kitchen faucet for granite sinks (Aquanita, Granisil)
