The company **Aquasanita** is one of the most well-known manufacturers of granite sinks on the market. It exports over 80% of its products to more than 30 countries worldwide. Aquasanita faucets and sinks meet the most demanding requirements for processing and quality.

The kitchen faucet **Aquasanita Signa 2083** is practical, easy to control. Thought out to the last detail. Thanks to advanced coating technology, the surfaces of Siliscana faucets are protected against scratching and chipping. The faucets' aerators help save water.

We offer the Aquasanita Singna 2083 sink faucet in a **chrome** finish or in a **combination of chrome and black granite**. The faucet will look great in combination with a granite sink in any color. The black granite faucet will perfectly complement the black granite sink, creating a unified color scheme

The sink faucet is rotatable by 360°, it has a Neoperl aerator and a branded ceramic cartridge Kerox 35mm. The modern design of the faucet will perfectly correspond with the current kitchen style.

Battery care is easy. Just wipe the kitchen faucet with soap or soapy water. Then rinse with warm water and dry. To prevent scratching the faucet, wash only with soft sponges or cloths. We recommend cleaning lime deposits that may accumulate over time with a small brush using a vinegar solution.
