The prestigious German company **Villeroy & Boch** presents its unique luxury range of granite sinks. Among these granite sinks, we have the modular sink **Chambord Thibert 895.2**. This beautiful sink features two asymmetrical washbasins.

The sink gives a luxurious and at the same time **minimalistic impression**. The sink will look great not only in a modern kitchen, but also in kitchens in the so-called Provence or Hugge style.

The sink has a visible front that becomes the **highlight of the kitchen**. In the back of the sink, there is a space that can be used, for example, as a draining area for smaller dishes. Alternatively, it can be used for a soap dispenser or a liquid soap dispenser. The sink has a very practical design with a sufficiently deep chamber (18.3 cm), in which you can comfortably wash even large baking sheets.

Modular sinks are making a comeback in the world of kitchens, just like the rustic style. A modular sink is directly mounted on a cabinet. The installation of the sink is recommended mainly for non-absorbent material countertops. In the case of a stone countertop, the sink is installed under the countertop, and in the case of a wooden countertop, we recommend the sink to slightly protrude above the countertop to prevent water contact.

The Thibert 895.2 granite sink is made of 85% quartz, which gives the sink a very natural appearance and provides maximum quality and durability. Its main advantages include excellent resistance to impact, scratching, and high temperatures.

Key features of the CHAMBORD THIBERT 895.2 kitchen sink

- granite double sink in white or black color
- Thibert 895.2 has an extended warranty of 5 years.
- minimalistic, ideal not only for modern kitchens
- visible front side with an extended back surface of the sink
- sufficiently deep basin (18.3 cm)
- modular installation of a sink
- suitable for cabinets from 90 cm

Note: Due to the method of production, it is very difficult to achieve a clearly black color with granite sinks. Sinks in black design tend to have a very dark gray color. For a perfect black, we recommend ceramic sinks.

< i>WARNING: Due to the traditional production technology, the dimensions of sinks may slightly differ when casting them into molds. For this reason, the manufacturer cannot guarantee the exact dimensions stated in the technical specification. When designing a kitchen, please consider a certain tolerance and preferably work directly with a specific sink. Thank you for your understanding. All our high-quality products are hand-finished and checked by our highly skilled and experienced team of professionals.< /i>
