The Donner MIST Liquid automatic liquid disinfectant dispenser is ideal for all areas requiring increased hygiene. After the application by hand, the dispenser releases the disinfectant in the form of a fine aerosol. This allows for quicker spreading of the disinfectant across the entire hands. The dispenser works with all types of liquid disinfectants. The refill is poured into the dispenser, so you are not bound to just one supplier of replacement refills.

Optional dispensing of one or two doses

The dispenser can dispense either one dose with a volume of 0.4ml or two doses in quick succession (2 x 0.4ml). Setting the dispenser to dispense two doses is especially suitable for trained personnel, as it allows them to disinfect both hands. A 1000ml container is sufficient for 2500 individual doses.

Easy fulfillment

The liquid disinfectant is easily refilled into the dispenser, you can use any liquid disinfectant. This way, you can always choose the disinfectant that suits you the most and not be tied to just one supplier. The dispenser's reservoir is secured against unauthorized manipulation by a service key.

Power supply by adapter or batteries.

The dispenser can be powered by 8 pieces of AA pencil batteries. When using high-quality alkaline batteries, the dispenser can function in normal operation for more than half a year. The automatic

dispenser can also be powered by a power adapter, which can be purchased separately.

Easy maintenance

The body of the device is made of ABS plastic, which is smooth and durable. As part of regular cleaning, simply wipe the automatic dispenser with a cloth and a regular cleaning agent. The nozzle is removable for rinsing.

Notice: For proper functionality of the automatic dispenser, only use the power batteries specified by the manufacturer. Do not use non-alkaline and rechargeable batteries, as this type leads to its rapid self-discharge.

Parameters

Basic parameters

Model:	DONNER Mist Liquid
Warranty period:	2 years
Product TARIC code:	84798997

Technical parameters

Method of attachment / installation:	Wall/stand
Housing material - case:	ABS plastic
Surface finish - color:	White dyed plastic
Boot system:	Automatic- infrared
Trigger distance:	3-10 cm
Status indication:	LED diode
Dispenser capacity:	1000 ml
Job description:	Liquid disinfection
Refilling the cartridge.:	Refilling with a wide throat
Dose setting:	1 x 0.4ml / 2 x 0.4ml
Number of doses per one filling:	2500
Operating temperature:	0-45 °C

Electric specifications

Power:	8x AA 1.5V (non-rechargeable batteries only)
--------	----------------------------------------------

Protective and security elements

Prevention of unauthorized manipulation:	Service key
------------------------------------------	-------------

Dimensions, weight, packaging

Device dimensions:	262x114x123 mm (w/l/h)
Device weight:	0.758 kg
Packaging dimensions:	280x120x125mm (w/d/h)
Weight including packaging (kg):	0.85 kg
Packing method:	Protective film, cardboard box
Width of the packaging:	12
Height of the packaging:	28
Depth of the packaging:	12.5
