The brand **Granisil** has expanded its product range with granite flower pots - in a wide range of colors, different shapes, and sizes. Granisil flower pots provide comfort and beautiful design for plant growers.

Give your plants and your home a refresh with our new granite flower pots. The innovative high-quality granite flower pot **KUBI, 60 cm tall**, is suitable for both indoor and outdoor use. Its geometric, minimalist, and elegant design makes it a decorative addition to any interior or garden.

Granisil flower pots are **100% frost-resistant**, which means they can be placed year-round on a terrace, balcony, or by entrance doors. You can install any flowers, herbs, or decorations for different seasons and holidays.

The advantage of granite flower pots is their **wide range of colors** (anthracite, black, white, gray, and beige), so you can easily coordinate them with the surroundings, for example with garden furniture on the terrace, with the floor around the pool, or with the color of the entrance doors. They fit perfectly into any interior or exterior.

As growers of ornamental plants, you will certainly appreciate the weight of the flowerpot. The Kubi flowerpot, which is 60 cm tall, weighs 26 kg. Therefore, the flowerpot will not tip over even in strong gusts of wind. For outdoor use, the flowerpots are equipped with a so-called **drainage hole for water drainage**. Conversely, when used for indoor arrangements, they are supplied with a sealing plug.

Key features of the granite planter GRANISIL KUBI, height 60 cm

- high-quality granite flowerpot in a wide range of colors - gray, white, black, beige, and anthracite
- harmonious and modern design
- geometric, minimalist, elegant shape
- 100% frost-resistant
- for indoor and outdoor use
- equipped with a drainage opening and a sealing plug
- The advantage is the height and the high weight of the flower pot.

Note! When installing a flower pot outside, we recommend removing the sealing plug. This will prevent the plants from waterlogging (water will simply drain out) and at the same time prevent damage to the flower pot that could occur if the water inside froze.

Parts of the packaging:

- sealing plug

Parameters

Basic parameters

Warranty:	2
HS code:	42121
