The brand **Granisil** has expanded its product range with granite flower pots - in a wide range of colors, different shapes, and sizes. Granisil flower pots provide comfort and beautiful design for plant growers.

Give your plants and your home a revitalization with our new granite plant pots. The innovative high-quality granite plant pot **MONTI, 76 cm tall**, is suitable for both indoor and outdoor use. Its geometric, minimalist, and elegant shape turns the flower container into a decoration for the interior or garden.

Granisil flower pots are **100% frost-resistant**, which means they can be placed year-round on a terrace, balcony, or by entrance doors. You can install any flowers, herbs, or decorations for different seasons and holidays.

The advantage of granite flower pots is their **wide range of colors** (anthracite, black, white, gray, and beige), so you can easily coordinate them with the surroundings, for example with garden furniture on

the terrace, with the floor around the pool, or with the color of the entrance doors. They fit perfectly into any interior or exterior.

As growers of ornamental plants, you will surely appreciate the weight of the flowerpot. The MONTI flowerpot, which is 76 cm tall, weighs 28 kg. Therefore, the flowerpot will not tip over even in strong wind gusts. For outdoor use, the flowerpots are equipped with a so-called **drainage hole for water drainage**. On the other hand, when used for indoor arrangements, they are supplied with a sealing plug.

Key features of the granite flowerpot GRANISIL MONTI height 76 cm

- high-quality granite flowerpot in a wide range of colors - gray, white, black, beige, and anthracite
- harmonious and modern design
- geometric, minimalist, elegant shape
- 100% frost-resistant
- for indoor and outdoor use
- equipped with a drainage opening and a sealing plug

Note! When installing a flower pot outside, we recommend removing the sealing plug. This will prevent the plants from waterlogging (water will simply drain out) and at the same time prevent damage to the flower pot that could occur if the water inside froze.

Parts of the packaging:

- sealing plug
