**3 630 Kč**

3 000 Kč bez DPH

The new product on the market is the Seina flexi SE918.0/10 kitchen mixer tap, which is designed for "two waters" - drinking water and utility water. The tap is manufactured by the Czech company Slezák - Rav CZ, s.r.o., which emphasizes honesty and tradition. It has been operating on the market since 2001. The products of the brand Slezák Rav CZ, s.r.o. come with an exceptional ten-year warranty.

The **Rav Battery - Slezák Seina flexi SE918.0/10** is specially designed for households that use two types of water. One type as utility water, for example for dishwashing. The other type is drinking water or filtered water. This water is always cold.

These waters enter the battery separately and pass through the entire battery, including the spout, separately as well. This spout is made in such a way that there is a tube inside it through which drinking / filtered water flows all the way to the aerator, where it also comes out separately. Today, the trend is one battery for "two waters". This **battery replaces two batteries** that some companies still use to this day, thus saving space on the sink.

**This battery is offered in a variety of colors:**

- shiny chrome / matte black

**Key features of the RAV Slezák Seina flexi SE918.0/10 kitchen faucet**

- attractive kitchen faucet in a modern design
- Seina flexi SE918.0/10 with a 10-year warranty.
