The prestigious Polish company **Zelvo** specializes in the production of technical sinks and castings for a wide range of industrial uses. These are very high-quality sinks at an affordable price.

The technical sink **Compact 505 by Zelvo** is made of Polypropylene (thermoplastic polymer), also known as hardened plastic. This type of sink is suitable mainly for cellar spaces, workshops, garages, gardens, and all technical and cleaning rooms, as well as production halls, as a drain where traditional kitchen sinks are not required.

Compact 505 sink is **mounted to the wall, therefore a countertop is not necessary**. The sink can also be placed in a kitchen unit (top-mounted). It is also possible to drill a hole for a faucet or a dispenser for soap. The package includes mounting screws, a siphon, an overflow, a drain, a plug, and a connection for a dishwasher.

The sink has become a very popular and sought-after type. If you are looking for a **durable, stylish**, plastic sink, with wall mounting, suitable for the garden or any technical purpose, the Compact in three color variants is the right choice for you.

Among the main advantages of the material used for the production of **Polypropylene** are resistance to extremely high temperatures, low temperatures. The surface prevents rusting, cracking. Resistance to impacts or mechanical damage.

Key features of the ZELVO COMPACT 505 technical sink
